Our company

POLYDROS, S.A

Manufacturers since 1961

Ever since its foundation over 60 years ago, POLYDROS, S.A. has pursued an environmentally friendly and chemical-free production approach coupled with meticulous quality control.

All of our processes follow rigorous quality controls to ensure that each product meets the most stringent standards and thus guarantee maximum customer satisfaction. Because we know that customer satisfaction can only be achieved with a quality product

Manufacturers

With over 60 years of experience, POLYDROS is the leading company in the manufacture of pumice stone. Our production process allows us to produce the best pumice stone on the market.

Ecology and Environment

POLYDROS, S.A. only uses selected recycled glass as raw material and does not use plastics or petroleum derivatives. The entire production process is carried out with green energies. Our products have been classified as non-toxic and without harmful effects on living organisms by independent laboratories.

Quality controls

POLYDROS, S.A. has implemented numerous quality controls to offer the best product to our customers. Our products are tested by independent laboratories that guarantee the best quality. Our production method quality is backed by the UNE-EN-ISO-9001 certification

Manufactured in Spain

All our products are manufactured in our facilities in Madrid. We offer the biggest benefits of proximity and quality to our customers.

Production process

Our cellular glass is produced by melting recycled glass powder in specialized furnaces. Due to its inorganic composition, bacteria, fungi and other microorganisms cannot survive in it.

Sustainable production

Manufacturing with recycled raw materials, using mainly renewable sources and with zero net CO₂ emissions

Quality

Each phase of the production process is carefully analyzed to guarantee the highest quality standards

Unique production process

Internationally patented production process, the only one of its kind in the market.

Our pumice stones

Eco-friendly

All our products are eco friendly. Made from recycled and non-toxic materials in a CO2-neutral production system

Hypoallergenic

Designed to harmlessly treat the skin. Certified by independent laboratories

Chemical free

We use no harmful chemicals in our unique production process. Each unit is controlled to offer a safe good

Non toxic

Our stones are toxicity-free. Completely safe for health, children and pets

Bacteriostatic

Thanks to its special composition, bacteria cannot survive on its surface

High quality

Our patented production system guarantees the highest quality of each product

Types of stone
